

# Sprint 6 Artifact

Members: Nathan Hollerbach , Alton Ou, Kenny Lay, Kenny Yontwises , Ben Pham

## Done List:

1. Fixed cases/deaths/recoveries sorting
2. Included graphs for cases/deaths/recoveries
3. Comparison of Two states/provinces with graphs (Alton)
4. Daily Cases (Kenny Y.)
5. Prettied up import site with css (Ben)
6. Peak confirmed, death, and recovered cases given country and state.(Kenny Lay)

## TODO:

### Improvements:

1. Make things more pretty...more css
  - a. Background visuals(Nathan)
  - b. Foreground visuals (Ben)
  - c. Side bar (Alton)
2. Add Incremental analytics
3. Fix bugs(nathan)
4. More error checking for user input
5. See if we can make things more efficient..
  - a. Ex: when clicking import instead of having to click return to go back to search it returns to search after import is done.
6. Fix confirm to death link to return none html output
7. Confirm to death base off state/province or country

### Implementations:

1. Recovery Rate - incremental analysis
2. Confirmed Daily Cases - incremental analysis

### Test Cases:

1. Feature 1 Recovery Rate - I want to see an improvement in speed from the first the time the analytic is run to the consequent times it is run.
2. Feature 1: Confirmed daily cases - When querying for the same month and location, I want to be able to see a faster return time compared to the initial query.
